1. ~~New Co-Op Possibility!~~ *also* The Dean of the College of Pure and Applied Science, Northeast Louisiana University yesterday invited the Agency to participate in their Co-Op Program. Majors of interest to us include Chemistry, Computer Science, Math and Physics.

✓ 2. Federal University?: [] received a phone call on Wednesday from Mildred Lehmann of the Government and General Research Division, Library of Congress. Ms. Lehmann informed [] that the Library of Congress had been tasked to do a feasibility study on the possible creation of a Federal University that would rank with the Military Service Academies. Its purpose would be to prepare young people for careers in Government. She asked Mr. [] what the Agency's position would be on the creation of such a school. He said that it would not be appropriate for him to take an Agency position on the matter. She then asked that if such a university came into existence would this Agency seek to recruit its graduates. She was assured that if its academic offerings were in fields of interest to us we would be pleased to recruit there. In order to give Ms. Lehmann some background on the academic fields of interest to this Agency professional brochures were sent to her.
